Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, 15-29, drawn to an optical fiber connector cleaner.

Group II, claim(s) 13-14, drawn to a method for cleaning the end surface of a ferrule of an optical fiber cleaner.

4. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Claims 13 and 14 are taught by JP 09-197182 to Tanabe et al. Tanabe discloses a method for cleaning the end surface of a ferrule of an optical fiber connector cleaner comprising: inserting into an optical fiber connector, the end of a cleaning section on which a cleaning tape is movably mounted under tension (Page 3, Paragraphs [0011]-[0012]); bringing the surface of a cleaning tape into contact with the tip of the ferrule of an optical fiber connector (Page 3, Paragraphs [0011]-[0013]); rotating and moving the cleaning tape while the cleaning tape is brought into contact with the tip of the ferrule such that the cleaning tape is moved a uniform distance in the longitudinal direction (Page 3, Paragraph [0013]; Drawing 1). Therefore, there is a lack of unity because there is not a corresponding special technical feature that defines a contribution over the prior art.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship

Art Unit: 4132

must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. A telephone call was made to Michael White on January 26, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

7. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

8. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
